EXPERIENCE

Walmart Global Tech - *Senior Software Engineer***,** Herndon, VA **Jan 2023 – Present**

- To give store associates a faster way to get work done, built an agentic app that turns natural language into automated workflows using real-time store data via MCP tools and skills, reducing manual data lookup by **80%** and now scaling across multiple markets
- To support multimodal AI experiences across store products, engineered multi-agent orchestration on Google ADK for the Store Agentic Platform, enabling voice, vision and text conversations and giving associates real-time store information in one place
- To unify fragmented data access, built a federated GraphQL gateway across **30+ providers** and ingestion pipelines for billions of events, delivering **99.999%** availability for **millions of users**
- To scale event streaming for higher throughput and reliability, led a live migration of **3M+ events/day** from Azure Service Bus to Kafka, designing partitioning and consumer rebalancing strategies that delivered zero downtime and zero data loss during cutover

Red Hat Inc. - *Software Engineering Intern***,** Boston, MA **May 2022 – Aug 2022**

- To help global enterprise users adopt open-source Ansible products in their own languages, co-developed the official **Ansible-Memsource** collection, automating the end-to-end localization pipeline through the Memsource translation API and reaching **2,000+ downloads** on Ansible Galaxy

Northeastern University – *Teaching Assistant***,** Boston, MA **Sept 2021 – Dec 2022**

- To support graduate students in core software design courses, served as Teaching Assistant to Professor Daniel Peters for CSYE 7374 (Design Patterns) and CSYE 6200 (Object-Oriented Design)

Adnet Global – *Python Developer***,** Remote, India (Part Time Freelance) **May 2021 – Sept 2021**

- To streamline client onboarding for a software solution, built automated setup workflows on top of its API endpoints

Decimal Point Analytics – *Python Programmer***,** Remote, India **June 2020 – Sept 2021**

- To help clients turn raw data into meaningful insights, built interactive data visualizations, web applications, and automation scripts using Python and JavaScript libraries

Intertrust Group (CSC) – *Python/ Linux Admin***,** Mumbai, India **Sept 2016 – June 2020**

- To reduce manual operations overhead supporting hedge fund clients, automated recurring Linux administration tasks with Python scripts, eliminating routine human intervention across hundreds of workflows

PROJECTS

- **LLM Platform Primitives** – Open-source Python reference implementation of the platform primitives that turn one-off LLM apps into shared infrastructure, including intent classification, prompt versioning, token accounting and MCP server integration, prototyped on Google ADK with local models via Ollama
- **June 2024 – Walmart Hackathon** – Led a winning team project leveraging **Gemini Flash multimodal GenAI** to perform image-to-text conversion, designing the end-to-end solution and driving technical execution and presentation - *Link*

TECHNICAL SKILLS

Languages:	Python, Java & TypeScript/JavaScript
A.I. & Agents:	Google ADK, MCP, Agent Skills, RAG, LangChain, Vertex AI (Gemini), multi-agent orchestration, context engineering, prompt engineering
Backend & Distributed Systems:	FastAPI, Spring Boot, REST, GraphQL Federation (Apollo), Kafka, Memcached
Data:	PostgreSQL, MongoDB, BigQuery, Pandas
Infrastructure & Observability:	Kubernetes, Jenkins, GitHub Actions, Prometheus, Grafana, Splunk, OpenObserve

EDUCATION

Northeastern University, Boston, MA **Sept 2021 - Dec 2022**
Master of Science, Information Systems

University of Mumbai, Mumbai, India **Aug 2012 - May 2016**
Bachelor of Engineering in Information Technology

LEADERSHIP, SPEAKING & PROFESSIONAL ENGAGEMENT

- Article on Platforms for LLMs - *Link*
- Open-Source Contribution & Community Involvement in Google ADK, LangChain, OWASP Gen AI & more – [*Link*, *OWASP*]
- Speaker at QCon A.I. Boston - *Link*
- Judged a 600-participant hackathon in Jamaica, evaluating new talent for Intellibus's expansion in the country - *Link*, *News*
- Speaker at the A.I. Summit 2025 – *Link*
